INTERCRON

Talk through our exclusive communication system.

- Specifically designed to aid communication where normal speech is impaired by the use of glass security screens. No drilling is required so the operator remains secure.
- Specially designed for security companies, Buildings, country clubs, etc.
- A car-truck pedestal can be supplied.
- The operating controls are in a small desktop console.
- Electronics is distributed in its three components: the console, the baffle and the supply. The mechanisms are linked by connectors and terminal boards to facilitate installation and make it insensitive to external interferences. Its excellent sound output and adequate power allows to call customers waiting to be assisted at the checkout area.

Powered semi-handsfree Security Intercom
