

ANTI-VANDALISM INTERCOMUNICATOR "SEMI FREE HANDS"

MODEL IC-2007 AV

- Operator commands communication.
- On/off and talk/listen push buttons.
- Anti-vandal metal push buttons with rounded edges to avoid disassembly.
- Internal transmission and reception volume control. Integrated buzzer to receive calls from the baffles.
- The electronics of the Intercomunicator security intercom system model IC-2007 AV, is distributed in its three components: the console, the baffle and the power supply. They are linked by connectors and terminal boards to facilitate installation and make it insensitive to external interferences.
- Its excellent sound output and adequate power allows calling people distant from the baffles.
- Anti-disassembly screws.

Talk safely!!!
